This book surveys Britain's foreign policy since 1870. Conventional accounts stress the rulers' benevolent rhetoric: I present the evidence that refutes this superficial, liberal view. Britain's economy is the key to understanding its foreign policy: capitalism causes a conflict-ridden foreign policy. The rulers' focus has been on seizing profits from abroad, for which they have sacrificed the welfare of the British people. British governments - Conservative, Liberal and Labour alike - have represented the tiny minority who own the means of production, and have opposed the great majority who have to work for a living. This study brings together the expertise of an international group of scholars to survey the development of political and economic relations between Britain and the Netherlands from the Napoleonic era to the present day. The contributors address topics ranging from Anglo-Dutch relations in the era of imperialism; the tensions created by Dutch neutrality in the First World; the challenges of the inter-war years; the role of the Dutch in British strategy during the Second World War; colonialism and decolonisation; and, most recently, bilateral relations in the European framework. Based on detailed research in British and Dutch archives, *Unspoken Allies* provides new insights into relations between two of the principal "amphibious" powers of Europe across the last two centuries.
