Japanese Buddhist architecture is the architecture of Buddhist temples in Japan, consisting of locally developed variants of architectural styles born in China. After Buddhism arrived the continent via Three Kingdoms of Korea in the 6th century, an effort was initially made to reproduce original buildings as faithfully as possible, but gradually local versions of continental styles were developed both to meet Japanese tastes and to solve problems posed by local weather, which is more rainy and h

Buddhist temples in China are commonly built in the emperor's palace style, categorising them as "palace architecture." This layout is designed with symmetry in mind, with the main gate and main hall in the center, and other facilities - including the celestial and the abbot's quarters - lined up on either side.
