As our knowledge of the human body becomes ever more exact, scientists have made remarkable leaps forward in many fields. Yet for one question that many of us would like answered-What causes the fat to burn fat?-we find all sorts of confusing claims. Since we know so much about how our body works, can't science tell us the answer? As it turns out, science already has.I have spent over ten years reading thousands of fat-loss studies. Not theories promoted by diet gurus. Only the proven data.My investigation uncovered all kinds of scientific findings: - Studies stating how certain foods cripple our ability to burn fat - Scientists showing how to burn fat while eating more food - Researchers revealing how to get all the benefits of traditional exercise in a tenth of the time - Physiologists finding out how eating less sets us up to gain fat in the long run - Doctors discussing how a few minutes of a new form of exercise immunizes us against fat gain - Endocrinologists explaining how we fix the underlying condition causing us to gain fat We deserve to know the proven facts about fat loss, but who has time to read tens of thousands of pages of scientific studies? The study took me more than a decade. It should not take you that long because the facts have been summarized in this book. They have also been simplified, so anyone who wants to lose weight can understand them. Make no mistake. Tons of clinical studies have shown the best way to trim off those unwanted pounds.It is time to stop listening to marketing myths about how to lose weight. We tried it. It failed. Join the 27,000 people who have achieved dramatic and long-term weight loss with The Setpoint Diet, from the New York Times bestselling author of The Calorie Myth. Your body fights to keep you within a range of about 15 pounds -- also known as your "setpoint weight." New research reveals that you can lower your setpoint and end that battle for good by focusing on the quality of calories you eat, not the quantity. With The Setpoint Diet, you will reprogram your body with a 21-day plan to rev up your metabolism, eliminate inflammation, heal your hormones, repair your gut, and get your body working like that of a naturally thin person -- permanently. The Setpoint Diet is a lower-carb menu that focuses on specific anti-inflammatory whole foods, including tons of produce, nutritious proteins, and therapeutic fats. Its creator, Jonathan Bailor, founded SANESolution, a weight loss company that has reached millions of people. Proven to help you lose weight naturally and maintain it, The SetpointDiet is your new blueprint for healthy living.

What if everything you thought you knew about weight loss was wrong? When it comes to most things in life, we welcome research and progress. From the convenience of our smartphones to the technology in our hospitals, scientific advancement allows us to live better. So why are we still following weight-loss advice from the 1950s? Why haven't we ever questioned the "calories in/calories out" model at the foundation of every diet and fitness plan-a formula that, not coincidentally, has accompanied record-breaking levels of obesity? In The Calorie Myth, Jonathan Bailor exposes the fundamental flaw upon which the diet industry is built and offers a new equation: eat More + exercise Less = weight loss If calorie math added up, 100 calories of vegetables = 100 calories of candy. That doesn't seem right-because it's not. While some calories fuel weight loss, others work against us. In The Calorie Myth, Bailor shows us how eating more of the right kinds of foods and exercising less, but at a higher intensity, is the true formula for burning fat and boosting metabolism. Why? Because eating high-quality foods, like whole-food plants, proteins, and fats, balances the hormones that regulate your metabolism. Eating poor-quality foods, like refined starches, sweets, and processed foods, causes a hormonal imbalance, throwing your metabolism off kilter and causing you to store food as fat-regardless of how many calories you consume. In this revolutionary weight-loss program informed by more than 1,200 scientific studies, Bailor offers clear, comprehensive guidance on what to eat and why, providing an eating plan, recipes, and a simple yet effective exercise regimen. Losing weight doesn't have to mean going hungry or spending hours at the gym. Don't let outdated calorie math stand between you and the life you want: discover the new science of weight loss with The Calorie Myth.

Do you want to lose weight while still enjoying your favorite food? Are you tired of the usual diet ? Have you ever heard about the Set point diet? Buy Now this book to know the answers! Buy the Paperback Version of this Book and get the Kindle Book version for FREE

Tired of trying to figure out what you should be eating for breakfast, or whether it's ever OK to before going to bed? Want to know which type of milk, or cereals, or meats are best so that food shopping is easier? Millions of people already eat, look, and feel better thanks to popular podcast host and board-certified nutritionist Monica Reinagel. In her highly-anticipated guidebook she sorts through all the conflicting nutrition information out there and busts outdated food myths, so you'll know exactly what to eat (and what to avoid) once and for all. Don't worry if pasta makes you happy, if chocolate keeps you sane, or if you just can't stand broccoli; no food is off limits and none is required. Instead, Monica walks you through every aisle of the grocery store and through each meal and snack of the day, helping you make healthier choices and answering your burning questions, including: - How often should you eat? - Which organic foods are worth the extra cost? - Does cooking vegetables destroy the vitamins? - Should foods be combined in certain ways for better digestion? Complete with grocery shopping lists, simple, delicious recipes, and sample meal plans, Nutrition Diva's Secrets for a Healthy Diet will have you feeling healthier, looking better than ever before, and no longer worrying about what to eat for dinner.
