graph is identical to the original.  
In function notation, periodic means that, for all  $t$  in the domain of  $f$ ,  $f(t+c) = f(t)$ . The smallest positive constant  $c$  for which this relationship holds for all values of  $t$  is called the period of  $f$ . The midline of a periodic function is the horizontal line midway between the function's ...
