Featuring two complete practice papers, and written by recently graduated Foundation doctors, this is essential for any medical student preparing for Finals to test understanding, identify weak areas, consolidate knowledge, and hone decision-making skills.

Crash Course is your effective every-day study companion PLUS the perfect antidote for exam stress! Save time and be assured you have the essential information you need in one place to excel on your course and achieve exam success. This volume includes well over 1000 SBAs and EMQs for Medical Finals, which have been divided into 16 commonly tested areas of medicine, surgery and sub-specialities, allowing for thorough and efficient revision by specialty. Questions have been completely rewritten and updated to reflect current clinical guidelines. Every question includes a clear answer as well as an extended explanation for each answer option, to enable you to quickly understand your strengths and weaknesses and to learn effectively from any mistakes. All information has been thoroughly checked and quality assured by expert Faculty Advisers, so you can be confident it is fully accurate and that questions most closely match current exam formats and topic coverage. This (print) volume also comes with BONUS access to the complete, enhanced eBook this allows you to read as a 'regular', downloadable eBook, as well as to test yourself via the interactive-quiz function. Whether you need to get out of a fix or aim for a distinction Crash Course is for you! Provides whole exam coverage in one place - saves valuable revision time Quality assured by leading Faculty Advisors - ensures complete accuracy of information Completely updated questions matching the latest exam formats confirm your understanding and improve exam technique fast Detailed answer explanations, including rationales why incorrect answers are wrong Updated to the latest clinical guidelines

This detailed guide is a must for medical students preparing for clinical attachment and final exams. Its wide-ranging approach is also ideal for those sitting GP entrance exams. Presenting short answer questions encompassing the entire current curriculum, this informative revision aid covers all bases.

Provides a range of short clinical cases with questions and detailed structured answers to test students' problem-solving and decision-making skills in a structured and objective fashion.

Get ahead! is a brand new essential revision series for medical and surgical finals. Each title contains practice questions similar to those you can expect in the real exam. The series stands out in its use of subject summaries that include all the detail you would need from a larger textbook!but we've waived the waffle! If you are looking for a comprehensive, reliable, effective revision aid, then look no further than Get ahead!

Acute Medicine is the central part of foundation and specialist general medical training and is one of the most rapidly expanding UK hospital specialties. Acute Medicine: Clinical Cases Uncovered combines patient cases and outcomes, drawn from real-life experiences, with reference to the curriculum for Training in General (Acute) Medicine. It provides self-assessment MCQs, EMQs and SAQs to give medical students, junior doctors, nurses and allied healthcare professionals the perfect preparation for life on the wards.

OSCEs for Medical Finals has been written by doctors from a variety of specialties with extensive experience of medical education and of organising and examining OSCEs. The book and website package consists of the most common OSCE scenarios encountered in medical finals, together with checklists, similar to OSCE mark schemes, that cover all of the key learning points students need to succeed. Each topic checklist contains comprehensive exam-focussed advice on how to maximise performance together with a range of 'insider's tips' on OSCE strategy and common OSCE pitfalls. Designed to provide enough coverage for those students who want to gain as many marks as possible in their OSCEs, and not just a book which will ensure students 'scrape a pass', the book is fully supported by a companion website at www.wiley.com/go/khan/osces, containing: OSCE checklists from the book A survey of doctors and students of which OSCEs have a high chance of appearing in finals in each UK medical school

Filling a gap for a pre-clinical phase revision guide, this book will help medics pass their intermediate exams in order to proceed to the clinical years. It is based on the SAQs, EMQs and MCQ school curriculum as set out by the GMC. By covering each module individually but also integrating other disciplines of medicine into the questions, it helps students to think laterally as well as thoroughly revising each module. With a minimum of 4 SAQs, 7 MCQs and 3 EMQs in each chapter, this book offers comprehensive revision practice as well as providing all the answers with clear explanations.

EMQs and MCQs for Medical Finals is a unique revision and study tool for Final Examination preparation. Practice questions cover a variety of key topics in both medicine and surgery, with the mixture of questions reflecting the general weighting in real exams. Comprehensive answer notes are provided for each question, explaining why a particular answer is correct and why others are not. Useful mnemonics and tips on remembering key facts help to consolidate learning.

Single Best Answer (SBA) examinations are an increasingly popular means of testing medical students and those undertaking postgraduate qualifications in a number of subject areas. Written by a final year medical student, junior doctors and experienced clinicians, 500 Single Best Answers in Medicine provides invaluable guidance from authors who understand from personal experience that detailed and accurate explanations are the key to successful revision. This book presents 500 SBA-style questions arranged by specialty area as well as a practice exam of random questions. A clear discussion of how the correct answer was reached and other options ruled out for every question is given at the end of each section, making this book an excellent learning aid during all stages of clinical studies, and particularly while preparing for medical finals.
