Solution manual to complex variables and applications 12 Chapter 1. Complex Numbers 9.Find all complex solutions of the following equations: (a) z=z; (b) z+z=0; (c) z= 9 z. Solution. (a) Let z=z+iy. Thus z = z x+iy = x+iy x iy = x+iy iy = iy y = 0 Hence, z=z if and only if Imz=0. (b) Let z=z+iy. Thus z+z = 0 x+iy+z+iy = 0 x iy+x+iy = 0 2x = 0 x = 0 Hence, z+z if and only if Rez=0. (c) In this part we have z= 9 z

This text is part of the International Series in Pure and Applied Mathematics. It is designed for junior, senior, and first-year graduate students in mathematics and engineering. This edition preserves the basic content and style of earlier editions and includes many new and relevant applications which are introduced early in the text. Topics include complex numbers, analytic functions, elementary functions, and integrals.

Designed for the undergraduate student with a calculus background but no prior experience with complex analysis, this text discusses the theory of the most relevant mathematical topics in a student-friendly manner. With a clear and straightforward writing style, concepts are introduced through numerous examples, illustrations, and applications. Each section of the text contains an extensive exercise set containing a range of computational, conceptual, and geometric problems. In the text and exercises, students are guided and supported through numerous proofs providing them with a higher level of mathematical insight and maturity. Each chapter contains a separate section devoted exclusively to the applications of complex analysis to science and engineering, providing students with the opportunity to develop a practical and clear understanding of complex analysis. The Mathematica syntax from the second edition has been updated to coincide with version 8 of the software. --
