$= 400$ and $X^2 + Y^2 + Z^2 = 390 < 400$, we see that $X < 20$, $Y < 20$ and $Z < 20$. 1 Set up a spreadsheet with 1 to 19 down a column (X) and across a row (Y). In each cell, calculate $390 - X^2 - Y^2$. Look for integer values.

GAUSS STUDENT SAMPLE PROBLEMS: SOLUTIONS

Gauss was about 9 years old -- already a super genius (much like Wile E. Coyote.) His teacher hated math and hated Gauss (because he was so smart). As usual, the teacher walked into the class and gave them a horribly tedious arithmetic problem. They were to work on it and not bother him. Here was the day's problem: Add the integers from 1 to 100.

to see the solutions. 1. (easy) A student measures the electric flux through a closed spherical surface of volume V to be X . She then removes the charge from inside the spherical surface and places it in a closed cylindrical surface of volume $V/2$. She then claims that the flux through the cylindrical surface is $2X$.

ĩ ĩ ½ ĩ ĩ ½' [Books] Gauss Student Problems 2013 Answers ...

This is a brief version of the question. Some guy worked out 3^{10000} . Then he added up all the digits to make a number. Then he added up the digits of that number to make another number. He did this over and over again until there was only a one digit number. what was it. Steps please (working out) best answer to person who shows me "logical reasoning"..
