Building on its success, the range of products using PUREtec refrigerant has grown from the Carrier AquaForce PUREtec 61XWHZE range of high temperature heat pumps, to the AquaEdge 19DV centrifugal chillers, and now the AquaForce Vision PUREtec 30KAVP-ZE premium variable-speed air-cooled screw chiller and the AquaForce 30XBP-ZE fixed-speed air-cooled screw liquid chiller

A portion of U.S. Marine Corps forces currently located in Okinawa, Japan would be relocated to Guam. This relocation is proposed to occur during the same time-frame as a proposed wharf construction in Guam's Apra Harbor. A U.S. Army Air and Missile Defense Task Force is also proposed for Guam. For the purposes of this EIS, these three proposed actions are referred to as the Guam and the Common. of the N. Mariana Islands (CNMI) military relocation. This EIS will inform decisions based on an understanding of the environmental consequences of the proposed Guam and the CNMI military relocation and take measures to protect, restore, and enhance the environ. Figures and tables. This is a print on demand publication.

Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original "Defeat Germany First" strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and photographs, explains and illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.
