One of the most stupendous manifestations of the Spirit is undoubtedly that which has been handed down to us under the generic name of the Vedas. The Vedas are still too much neglected not only in the world at large but also in their country of origin. this Vedic anthology will make direct and fruitful knowledge of the Vedas available to a wider range of people than the small elite of pandits and Indologists. This anthology collects the most crucial texts of the Indian Sacred Scriptures--in all more than 500--newly translated into contemporary English. Dr. Panikkar's principle has been to select and place together texts so as to offer a selection of texts that cover the full range of 'The Vedic Experience' and at the same time to show how they manifest the universal rhythms of nature, history, and Man. Excerpts are taken from the oldest hymns, such as the Rig Veda; from the Brahmanas, the Aranyakas, or Forest Treatises, and finally the Upanishads, which represent the mystical and philosophical culmination of the Vedas. This is a book for meditation, for reading, public and private, as well as for thorough study at this wellspring of human wisdom. It should, moreover, facilitate that meeting of East and West so long desired and delayed, and now so imperative.

Philosophy as Samvada and Svaraj discusses Daya Krishna and Ramchandra Gandhi's respective intellectual contributions and speculates how one might take forward the work of the two persons who were among the most brilliant minds of our times. Both Daya Krishna and Ramchandra Gandhi emphasized freedom and autonomy of thought and upheld the importance of samvada, somewhat inadequate in its English translation as dialogue. And both of them were philosophers concerned with how philosophy might seek its svaraj, free from the orientalist hold of the religious, the colonial crippling of indigenous languages and institutions and the structures and categories of un-freedom that continue to haunt inhabitants of West and non-West. Philosophy must involve samvada—an open dialogue and intimate encounter between self and other. Both philosophers experimented with these concepts and were enormously creative. This book is a testament not only to the core values of philosophy, but also to how these values can be carried forward by new weaves of tradition and modernity.

This book presents a discussion of happiness that takes the shape of a dialogue between contemplative knowledge and practice or the wisdom traditions and the social sciences. It examines the different definitions of happiness in relation to wisdom traditions and the impact of these traditions on current research. It explores topics such as the pursuit of a good life, the pursuit of eudaimonia and the meaning of economic and social suffering from the perspective of the social sciences. It further discusses how the social sciences can meet people's aspirations towards a world of higher well-being in our time, and what the future challenges are. The book includes both theoretical and empirical contributions on the matter and opens up a new line of transdisciplinary research. Overcoming barriers between disciplines and fields of knowledge, the book presents a beneficial cross-fertilization to achieve a wiser model of man.
