Infrared Remote Control  
For Controlling

Infrared remote controls  
work well enough to  
have stuck around for  
25 years, but they do  
have some limitations  
related to the nature of  
infrared light. First,

# Online Library Infrared Remote

infrared remotes have a range of only about 30 feet (10 meters), and they require line-of-sight. This means the infrared signal won't transmit through walls or around corners -- you need a straight line to the device you're trying to control.
