A Standardized Terminology to Ensure Optimal Nutrition Care

Background: The Nutrition Care Process (NCP) and NCP Terminology (NCPT) is a systematic framework for critical thinking, decision making, and communication for dietetics practitioners worldwide, aiming to improve quality and patient safety in nutrition care. Although dietetics practitioners in several countries have implemented the NCP/NCPT during recent years, to date there is no globally validated instrument for the evaluation of NCP/NCPT implementation that is available in different ...

Guide for nutrition professionals to implement the four steps of the Nutrition Care Process: assessment, diagnosis, intervention, and monitoring and evaluation

The Abridged Nutrition Care Process Terminology (NCPT) Reference Manual includes select terminology to

implement all four steps of the Nutrition Care Process, as well as practice tools including snapshots, a nutrition assessment matrix, and a nutrition diagnosis matrix. The complete, unabridged reference manual is available via the electronic Nutrition Care Process Terminology (eNCPT), an online subscription product (<http://ncpt.webauthor.com>) that has reached approximately 1,500 terms. Subscribers to the eNCPT can also access the Nutrition Care Process chapter that provides detailed information on each step of the NCP and the "Ask a Question" feature.

"This publication includes only a portion of the material in the International Dietetics & Nutrition Terminology (IDNT) Reference Manual, second edition. The pocket guide includes the "Snapshots" and terminology for Nutrition assessment and monitoring and evaluation and nutrition diagnosis. The Pocket Guide is intended to be used in conjunction with the Reference Manual." -- Back cover.

About the Advanced Nutrition and Dietetics book series Nutritional interventions need to be based on solid evidence, but where can you find this information? The British Dietetic Association and the publishers of the Manual of Dietetic Practice present an essential and authoritative reference series on the evidence-base relating to advanced aspects of nutrition and dietetics in selected clinical areas. Each book provides a comprehensive and critical review of key literature in the area. Each covers established areas of understanding, current controversies and areas of future development and investigation, and aims to address key themes, including: Mechanisms of disease and its impact on nutritional status, including metabolism, physiology, and genetics Consequences of disease and undernutrition, including morbidity, mortality and patient perspectives Clinical investigation and management Nutritional assessment, drawing on anthropometric, biochemical, clinical, and dietary approaches Nutritional and dietary management of disease and its impact on nutritional status Trustworthy, international in scope, and accessible, Advanced Nutrition and Dietetics is a vital resource for a range of practitioners, researchers and educators in nutrition and dietetics, including dietitians, nutritionists, doctors and specialist nurses. Written in conjunction with the British Dietetic Association, Advanced Nutrition and Dietetics in Nutrition Support provides a thorough and critical review of the fundamental and applied literature in nutrition support. Extensively evidence-based and internationally relevant, it discusses undernutrition, nutritional screening, assessment and interventions, as well as key clinical conditions likely to require nutrition support, and the approaches to managing this in each of these conditions. Clinically oriented, Advanced Nutrition and Dietetics in Nutrition Support is the ideal reference for all those managing undernutrition in a range of clinical areas.

Workbook for Student

Complemented by: Manual of dietetic practice / edited by Joan Gandy in conjunction with the British Dietetic Association. Fifth edition. 2014.

Designed for graduate nutrition students, dietetic interns, and practicing dietitians, Clinical Case Studies for the Nutrition Care Process presents realistic scenarios for a variety of cases organized in the format of the Nutrition Care Process. Cases are drawn from the author's experience and collected from practitioners who are experts in their field, providing a variety of interesting scenarios. Topics such as adolescent obesity and dietary management in diabetes are explored. As a part of the American Dietetic Association's Nutrition Care Process (NCP), dietitians, educators, and students have been asked to adopt a new standardized language for nutrition diagnosis. While this process utilizes many aspects of the traditional care model, dietitians may be unsure of how to implement the completely new aspect of standardized language and Nutrition Diagnosis. Not only does this book include an introductory section on the Nutrition Care Process, but readers will learn how to use the standardized terms, develop a nutrition diagnosis, and apply the standardized language to specific clinical cases."
