This volume describes recent market dynamics and gives a detailed overview of the globalisation of the information and communication technology (ICT) sector and the rise of ICT-enabled international sourcing.

This volume describes the main trends in industries and businesses supplying IT goods and services. It looks at the impact of IT diffusion and applications, as well as the growing importance of network effects as the use of IT expands.

Describes recent market dynamics and trends in industries supplying IT goods and services and offers an overview of the globalisation of the information and communication technology (ICT) sector and the rise of ICT-enabled international sourcing.

This 2008 edition of the OECD Information Technology Outlook analyses recent developments in the IT goods and services industries, and suggests that the outlook is for constrained but continued long-term growth.

The OECD Communications Outlook 2005 presents the most recent comparable data on the performance of the communication sector and related policy frameworks in OECD countries.

This book presents various perspectives on innovative work behaviour, focusing on problem recognition, idea generation, idea promotion and the realisation of these ideas. It first highlights important corporate issues, such as uncertainty, performance management, technological infrastructure, and strategy development, and subsequently presents studies that offer solutions. Further, the book evaluates the significance of research and development, effective communication and corporate governance. Lastly, it discusses the implications of idea realisation, examining resource dependence theory, organizational trust and eco-innovations.

The OECD Communications Outlook provides an extensive range of indicators for different types of communications networks and compares performance indicators such as revenue, investment, employment and prices for services throughout the OECD area.

The OECD Communications Outlook 2009 presents the most recent comparable data on the performance of the communication sector in OECD countries and on their policy frameworks.

The OECD Communications Outlook presents the most recent comparable data on the performance of the communications sector in OECD countries and on their policy frameworks.

Published every two years, the OECD Communications Outlook provides an extensive range of indicators for the development of different communications networks and compares performance indicators such as revenue, investment, employment and prices for service throughout the OECD area.
