QUANTUM ORIGINS OF COSMIC STRUCTURE

This is an important result for understanding both the explosion mechanism of classical novae and the overall chemical evolution of the Universe. A new study of lithium production in a classical ...

Nova explosions alone cannot explain amount of lithium in current universe

is the theory of primordial nucleosynthesis put forward by Alpher and Gamow (Gamow added Bethe's name as a joke) in the late 1940s. The theory attempted to explain nuclear abundances by a single ...
