A fun, violent, and strange take on superhero comics produced by a mix of renegade alternative talents collaborating with bronze age veterans.Old world meets new world as indie cartoonists and classic comic book creators collaborate with Editor-In-Chief Josh Bayer to unleash a superhero book that dares to follow its own path. ALL TIME COMICS embraces old-school, four-color nostalgia to deliver everything you could hope for in comics, a seamless circle between the past and the future. Atlas - his only weakness is fear! Blind Justice - the man who walks through bullets! Bullwhip - here to put a stop to the bullsh*t! Crime Destroyer - will fight for justice or die trying!These four heroes face an over-the-top lineup of villains including The Misogynist, Raingod, White Warlock, Krimson Kross, P.S.Y.C.H.O., and the Time Vampire.ALL TIME COMICS features the work of current indie comics creators like Josh Bayer, Benjamin Marra (TERROR ASSAULTER: O.M.W.O.T.) and Noah Van Sciver (FANTE BUKOWSKI), alongside the work of established artists like Al Milgrim (co-creator of Firestorm) and the last art by legendary artist Herb Trimpe, co-creator of Wolverine.

Witness the first daring attempts of the villainous Cobra Commander and his minions to cause havoc around the world, only to have the Joes thwarting them at every turn.

It'd be hard to find anyone interested in comic books and their history who hasn't heard of Todd McFarlane's legal woes, but very few outside of McFarlane's immediate circle know just how many legal fights he was facing as the 1990s closed. Virtually all of McFarlane's court cases came down to three decisions, made by him alone. The first was to name a mobster in his Spawn comic after a hockey player, Tony Twist. The second was to hire Neil Gaiman to write a single issue of Spawn and the third came when he decided to buy all the remaining assets from Eclipse Comics at their bankruptcy sale. The first decision led to the Tony Twist trial, last two choices lead to Neil Gaiman filing suit and, ultimately, winning a portion of the Spawn universe and the hotly sought after, by some, character Miracleman.The Tony Twist trial was the beginning of a long, long period of uncertainty for Todd McFarlane and very nearly brought down the empire that he'd worked so hard to build. At its worst point, McFarlane was fighting to save his companies, to keep his characters and simply to survive. He was facing battles from several fronts, from people he did not previously personally know in the form of Tony Twist, to those whom he'd collaborated with, in the form of Neil Gaiman and also in bankruptcy courts. Clearly the fight that cost him the most, in pure financial terms, was that brought against him by Tony Twist. It would take years, and millions of dollars, to finally resolve. But the fight that potentially hurt him the most, both personally and professionally, was the one brought by Gaiman, as it gave the impression that McFarlane had appropriated characters created by Gaiman (albeit within the confines of the Spawn universe, along with Miracleman - but that's a book in itself) without proper accounting, permission or payments. This, to the comic book industry at large, showed McFarlane to be no better than the corporations that he'd spent years rallying against - Marvel and DC Comics. It would take the better part of two decades before McFarlane would emerge free and clear from these fights. He came out of it battered, bruised, facing charges of hypocrisy and with a serious hit to his reputation, but he wasn't totally beaten. Despite those who wished to see McFarlane fall completely from grace, he emerged relatively intact.

Forensic Chemistry is a comprehensive overview of the subject aimed at those students who have a basic understanding of the underlying principles and are looking for a more detailed reference text. This book is aimed at advanced students who are studying forensic science or analytical chemistry, faculty and researchers, and practitioners such as crime laboratory bench scientists. The authors will assume that the reader will have an introductory knowledge of forensic science and forensic chemistry and will have had analytical, organic and instrumental chemistry. None of the major analytical chemical techniques will have separate treatments in the book, with the exception of forensic microscopy, which will have a chapter because many students in chemistry and forensic science do not get dedicated classes in this area. The book will have separate chapters on all of the major areas of forensic chemistry and, in addition, will have a chapter devoted to chemometrics, which is the statistical treatment of large amounts of data to discover groupings, similarities and differences among the data. Each chapter will be written by an acknowledged international expert in that area. Each author will be given detailed instructions as to the intended audience, as well as expected breadth and depth of coverage of the material in the hopes that this will minimize the problem of uneven coverage of topics and chapters that often occurs in edited books. Although each of the types of evidence covered in the book use methods of analysis that lie outside chemistry, these will be mentioned only for completeness in passing. The emphasis will be on the use of chemical tools in evidence analysis. This book is designed to be either a text book for an advanced forensic chemistry course, or a treatise in forensic chemistry for the scientist who wants to learn the subject in some depth. It is not designed to be a survey of the current literature in the field or a reference manual.

Bill, the Galactic Hero is written by Harry Harrison who is also the author of Deathworld, Make Room! Make Room! (filmed as Soylent Green), the popular Stainless Steel Rat books, and many other famous works of SF. "Simply the funniest science fiction book ever written."--New York Times bestselling author Terry Pratchett At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
