The chilling Saga of Darren Shan, the ordinary schoolboy plunged into the vampire world.

From the bestselling author of The Bomber Mafia: discover Malcolm Gladwell's breakthrough debut and explore the science behind viral trends in business, marketing, and human behavior. The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire. Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. “A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world.” –Michael Lewis

Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller Outliers, offers a powerful examination of our interactions with strangers and why they often go wrong–now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn’t true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland–throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don’t know. And because we don’t know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller David and Goliath, Malcolm Gladwell has written a gripping guidebook for troubled times.

THE TIPPING POINT is the biography of an idea, and the idea is quite simple. It is that many of the problems we face - from crime to teenage delinquency to traffic jams - behave like epidemics. They aren't linear phenomena in the sense that they steadily and predictably change according to the level of effort brought to bear against them. They are capable of sudden and dramatic changes in direction. Years of well-intentioned intervention may have no impact at all, yet the right intervention - at just the right time - can start a cascade of change. Many of the social ills that face us today, in other words, are as inherently volatile as the epidemics that periodically sweep through the human population: little things can cause them to 'tip' at any time and if we want to understand how to confront and solve them we have to understand what those 'Tipping Points' are. In this revolutionary new study, Malcolm Gladwell explores the ramifications of this. Not simply for politicians and policy-makers, his method provides a new way of viewing everyday experience and enables us to develop strategies for everything from raising a child to running a company.

A tale of dragons and disaster that “masterfully blends fantasy, teen drama, and a strong message of environmentalism into a white-hot narrative” (Kirkus Reviews). In small town Virginia, Chloe McClellan’s sophomore year of high school is rapidly turning into an epic fail. First, she becomes the target of the queen of the It-Girls in gym. Then, she’s struck by lightning . . . and that’s when things really start to get weird. There are disconcerting gaps in her memory, and freaky weather seems to follow her everywhere. Either she’s going insane, or her accident has awoken a terrifying creature from mythology, triggering the final countdown to the extinction of humankind. Rising sea levels, droughts, earthquakes, tornadoes–far below the earth’s crust, imprisoned in ancient slumber, the elemental powers of the land grow restless . . . Chloe finds unlikely help from a trio of male classmates: the captain of the football team, a flighty stoner with a secret, and an enigmatic transfer student who longs for the sea. All the while, she struggles with the growing realization that dragons exist, and she and her friends may be the only ones who can stop them. In the first book in the epic new Tipping Point Prophecy series, global dragon mythology is

reimagined against a backdrop of ecological disaster, high school angst, and the power of the human spirit when working in accord with the elements. “A cautionary modern tale about climate change and pollution. The realistic, adolescent dramas buffeting [the] clever protagonist . . . are just as well-crafted as the passages on Chinese mythology and five-clawed, flying beasts.” –Slate

NATIONAL BESTSELLER "Terrific." – BEN SHAPIRO "Outstanding." – DANA LOESCH The Left is on the attack, and the war for our country is at a crucial tipping point. Liberals know they're within reach of radically transforming America. They don't like the U.S. Constitution. They're allergic to Americans' "gun culture." They find our faith and our devotion to family distasteful. And our commitment to liberty positively sends them into a panic. As soon as the Democrats get power anywhere, they stand ready to throw our God-given rights under the bus of political correctness, transgender insanity, and socialism (the economic system that always promises equality and utopia, but somehow always delivers resentment, poverty, and decay). So how can we tip the momentum back in our favor? How can we fight effectively for freedom, the U.S. Constitution, limited government, faith and family, and the survival of the American Republic? Liz Wheeler to the rescue! The popular host of One America News Network's "Tipping Point with Liz Wheeler" is a brilliant and highly effective debater who shows how we can go on the rhetorical attack against the Left—and win—with a multi-technique program for catching the Left in their inconsistencies and under-handed schemes and skewering them for their bold-faced lies. In Tipping Points: How to Topple the Left's House of Cards, Liz Wheeler identifies the five "Tipping Points" where liberals are poised to win, trains you in her proven debating techniques, and deputizes you to take up arms in the fight for our nation's heart and soul. It's training you need right now, today. Our country is at a tipping point. And make no mistake—if the Left isn't defeated, they're taking down America.

"One of the great strengths of Arctic Voices is that it shows how Alaska and the Arctic are tied to the places where most of us live. In this impassioned book, Banerjee shows a situation so serious that it has created a movement, where 'voices of resistance are gathering, are getting louder and louder.' May his heartfelt efforts magnify them. The climate changes that are coming have hit soon and hard in the Arctic, and their consequences may be starkest there."—Ian Frazier, The New York Review of Books A pristine environment of ecological richness and biodiversity. Home to generations of indigenous people for thousands of years. The location of vast quantities of oil, natural gas and coal. Largely uninhabited and long at the margins of global affairs, in the last decade Arctic Alaska has quickly become the most contested land in recent US history. World-renowned photographer, writer, and activist Subhankar Banerjee brings together first-person narratives from more than thirty prominent activists, writers, and researchers who address issues of climate change, resource war, and human rights with stunning urgency and groundbreaking research. From Gwich'in activist Sarah James's impassioned appeal, "We Are the Ones Who Have Everything to Lose," during the UN Climate Conference in Copenhagen in 2009 to an original piece by acclaimed historian Dan O'Neill about his recent trips to the Yukon Flats fish camps, Arctic Voices is a window into a remarkable region. Other contributors include Seth Kantner, Velma Wallis, Nick Jans, Debbie Miller, Andri Snaer Magnason, George Schaller, George Archibald, Cindy Shogan, and Peter Matthiessen.

Beyond the Tipping Point will likely bring to mind Malcolm Gladwell's seminal book, and the lessons that you have tried to apply in your daily life. However, while Gladwell implies that paying it forward will eventually pay off, the reality is that most people in today's business world are not willing to pay it forward. This book takes you Beyond The Tipping Point, by not only showing you how to build relationships, but how you can make them work to the mutual benefit of all stakeholders - including yourself.

From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times
