Cell Lines In Late ...

This book offers a highly interesting presentation and analysis of the ways tissues are handled, sold, used and conceptualized. For example blood, umbilical cord blood, cell lines and organs are discussed. Tissue Economies does not only describe the use of these tissues, but has also analytical discussions of biovalue, waste and information.

Blood, Organs, and Cell Lines in Late Capitalism. As new medical technologies are developed, more and more human tissues—such as skin, bones, heart valves, embryos, and stem cell lines—are stored and distributed for therapeutic and research purposes. The accelerating circulation of human tissue fragments raises profound social and ethical concerns related to who donates or sells bodily tissue, who receives it, and who profits—or does not—from the transaction.
