Mind Hack #5 Ask and you shall receive. When asking your boss or colleague for a favour, start big and then go small. Starting with a big favour which you know they are likely to say no to, means that they are going to feel bad and agree to the smaller one. And if they say yes to you at first, well, that's a win-win situation.

WINNER OF THE TELEGRAPH SPORTS BOOK AWARDS 2020 – GENERAL OUTSTANDING SPORTS WRITING 'A fascinating book about the psychology of elite sport... Mind Games explores compelling territory.' Don McRae, the Guardian 'An amazing book that I very much enjoyed.' Simon Mundie, Don't Tell Me the Score (BBC Podcast) 'a fascinating book' Daily Mail It's well known that to reach the top in elite sport, you need to have spent years honing and perfecting your physical ability. However this is only part of the template required to win – the other half is about mind games. Throughout her career as one of the world's top athletes, Annie Vernon struggled with existential questions about the purpose of sport in our comfortable, first-world society: Why do we do it? What is it in our psyche that makes us push ourselves to the limit? What allows us to mentally overcome the physical pain? Now retired from competition, Olympic silver medallist and world champion rower Annie

Vernon has decided to look for answers to these questions. Drawing on her personal experiences and interviews with some of the best coaches, athletes and psychologists from across the world of sport – including Lucy Gossage, Katherine Grainger, Matthew Pinsent, Brian Moore, Brian Ching and Dr Steve Peters – Annie discovers the secrets of how athletes train their brains in order to become world beaters. Annie debunks the myth that elite performers are universally cool, calm and brimming with self-assurance. Through exploring the bits on the inside that nobody can see, Annie instead creates a new understanding of what it takes to be successful in sport and uncovers that, in fact, an elite athlete is not that different from you and me. It's simply a question of mind games.

A teen programmer at a school for geniuses must join forces with a boy she can't remember to stop a hacker from deleting their memories in Shana Silver's action-packed YA debut, *Mind Games*. Arden sells memories. Whether it's becoming homecoming queen or studying for that all important test, Arden can hack into a classmate's memories and upload the experience for you just as if you'd lived it yourself. Business is great, right up until the day Arden whites out, losing fifteen minutes of her life and all her memories of the boy across the school yard. The boy her friends assure her she's had a crush on for years. Arden realizes that her own memories have been hacked, but they haven't just been stolen and shared... they've been removed. And she's not the only one: her mysterious crush, Sebastian, has lost ALL of his memories. But how can they find someone who has the power to make them forget everything they've learned? how to rewire it Identify the lies your enemy wants you to believe Recognize and short-circuit your mental triggers for destructive thinking See how prayer and praise will transform your mind Develop practices that allow God's thoughts to become your thoughts God has something better for your life than your old ways of thinking. It's time to change your mind so God can change your life.

Mindful thinking is the new competitive edge Science confirms the distinction between the biological brain and the conscious mind. Each day, a game of mind versus matter plays out on a field defined by the problems we must solve. Most are routine, and don't demand a more mindful approach. It's when we're faced with more difficult challenges that our thinking becomes vulnerable to brain patterns that can lead us astray. We leap to solutions that simply don't work. We fixate on old mindsets that keep us stuck in neutral. We overthink problems and make them worse. We kill the ideas of others, as well as our own. Worse, we keep doing these things, over and over again, naturally and instinctively. But it doesn't have to be that way. In *Winning the Brain Game*, author and creative strategist Matthew E. May explains these and other "fatal flaws" of thinking, catalogued over the course of ten years and hundreds of interactive creative sessions in which he gave more than 100,000 professionals a thought challenge based on a real case far less complex than their everyday problems. Not only did less than 5% arrive at the best and most elegant solution, but the solutions given were remarkably similar, revealing seven observable problem-solving patterns that can block our best thinking. Calling on modern neuroscience and psychology to help explain the seven fatal flaws, May draws insights from some of the world's most innovative thinkers. He then blends

in a super-curated, field-tested set of “fixes” proven through hundreds of creative sessions to raise our thinking game to a more mindful level. Regardless of playing field, mindful thinking is the new competitive advantage, and the seven fixes are a magic set of tools for achieving it. Winning the Brain Game will lead you to better decision-making, higher levels of creativity, clearer strategies, and overall success in business, work and life. Matthew E. May is a five-time author and recognized thought leader on strategy and innovation. A popular speaker, facilitator, and seminar leader, he confidentially coaches executives, artists, and athletes, and conducts custom thinking sessions for leading organizations all over the world.
